Beginning on January 1, 2021, as permitted by SEC regulations, paper copies of the T. Rowe Price funds' annual and semiannual shareholder reports will no longer be mailed, unless you specifically request them. Instead, shareholder reports will be made available on the funds' website ( troweprice.com/prospectus ), and you will be notified by mail with a website link to access the reports each time a report is posted to the site.

April 30, 2019

If you already elected to receive reports electronically, you will not be affected by this change and need not take any action. At any time, shareholders who invest directly in T. Rowe Price funds may generally elect to receive reports or other communications electronically by enrolling at **troweprice.com/paperless** or, if you are a retirement plan sponsor or invest in the funds through a financial intermediary (such as an investment advisor, broker-dealer, insurance company, or bank), by contacting your representative or your financial intermediary.

You may elect to continue receiving paper copies of future shareholder reports free of charge. To do so, if you invest directly with T. Rowe Price, please call T. Rowe Price as follows: IRA, nonretirement account holders, and institutional investors, 1-800-225-5132; small business retirement accounts, 1-800-492-7670. If you are a retirement plan sponsor or invest in the T. Rowe Price funds through a financial intermediary, please contact your representative or financial intermediary or follow additional instructions if included with this document. Your election to receive paper copies of reports will apply to all funds held in your account with your financial intermediary or, if you invest directly in the T. Rowe Price funds, with T. Rowe Price. Your election can be changed at any time in the future.

T. ROWE PRICE GLOBAL ALLOCATION FUND

#### **HIGHLIGHTS**

- The Global Allocation Fund returned 7.97% in the six months ended April 30, 2019, and outperformed the Morningstar Global Allocation Index.
- The fund benefited from strong security selection within the underlying strategies, but overall exposure to sectors not included in the benchmark weighed on relative performance.
- We opportunistically added to our equity allocation following the meaningful downturn in equity markets in late 2018, but we modestly scaled back our exposure following a strong rebound early this year as we anticipate greater volatility given persistent uncertainties. We increased our allocation to high yield bonds as their corporate fundamentals remain broadly positive with low default expectations.
- We believe that broad diversification across asset classes, regions, and sectors, as well as our ability to actively adjust allocations to enhance the portfolio's risk/reward profile, should benefit the Global Allocation Fund across a range of market environments.

# Go Paperless

\*Certain mutual fund accounts that are assessed an annual account service fee can also save money by switching to e-delivery.

**CIO Market Commentary** 

#### Dear Shareholder

Global markets performed well in the six months ended April 30, 2019, the first half of your fund's fiscal year. The gains were broad-based, with nearly all developed and emerging markets recording positive returns. The U.S. dollar was mixed against major currencies during the period, helping insulate U.S. investors from last year's headwind of falling currency-adjusted returns.

Such an outcome was hardly clear at the start of the period, when many global stock indexes tumbled briefly into bear market territory. In the U.S., investors initially seemed concerned about rising U.S. interest rates, with the Federal Reserve ostensibly on course to keep raising the federal funds rate through 2019. Worries soon shifted to an economic slowdown, as disappointing data accumulated on housing, manufacturing, business investment, and consumer spending.

Signs of weakness in European and Asian economies were even starker. The contraction in the massive Chinese manufacturing sector, often viewed as a barometer of global demand, was especially worrisome in light of the ongoing U.S.-China trade dispute. The export-focused economies of Japan and Germany also struggled as businesses cut back investment in anticipation of new trade barriers.

Political concerns weighed on sentiment as well. In Europe, the new populist Italian government appeared to be headed for a standoff with the European Union (EU) over Italy's rising fiscal deficit, uncertainty over Brexit continued, and the French government sought to quell its own populist uprising in the form of the "yellow vest" protests. In the U.S., the partial government shutdown was seen as another threat to growth as it wore on.

The turnaround that began around the new year stemmed from improvements on many of these fronts. Most important, perhaps, was a pivot in Fed policy. In early January, Fed Chair Jerome Powell offered assurances that the central bank was prepared to counter any slowdown in the U.S. economy, and policymakers soon signaled that they did not expect any further rate increases in 2019. By April, many investors had even come to expect the Fed's next move to be a rate cut.

The global economic picture also brightened somewhat. U.S. consumer spending picked up after the government shutdown ended in late January, and the job market remained strong. Signs that the Chinese economy was responding to new government stimulus emerged in April, and rising oil prices suggested healthy global demand.

Europe remained the outlier, with growth continuing to stall in the core economies of France and Germany. In response, the European Central Bank announced that it would keep short-term interest rates near 0% through at least year-end, while also providing a new round of subsidized loans to banks to spur credit growth. Some calming in the region's political turbulence also helped restore confidence, particularly after the EU granted the UK a prolonged extension to come up with a revised Brexit plan.

Growing hopes for a resolution to the U.S.-China trade dispute further boosted global sentiment. In January, President Donald Trump declared that he was pleased with the progress in the negotiations, and he later canceled a March deadline for reaching a deal. In April, global markets rose after

the president declared that an "epic" deal was near, and reports surfaced that an agreement might be signed as early as May.

As of this writing, no trade deal has been inked, and markets have again become volatile as the two sides seem to be hardening their positions once again. I have no special insight into whether an agreement will be reached, but a deepening of the conflict into an all-out trade war would surely be negative for markets.

That said, I am encouraged by much of the feedback I am getting from our managers, analysts, and economists, who continue to see considerable potential in pockets of the global economy. Within Asia, for example, our team in Hong Kong sees opportunities in the Chinese auto and property markets, while our Tokyo team thinks changes in Japan's corporate governance will continue to benefit investors.

We think our emphasis on collaboration across offices and investment teams helps improve results for all our shareholders, and your fund's manager is a key part of that process. I am confident that our combined efforts will continue to help you achieve your long-term investment goals.

Thank you for your continued confidence in T. Rowe Price.

Sincerely,

Robert Sharps

Group Chief Investment Officer

Robet for Shoupe

Management's Discussion of Fund Performance

#### **INVESTMENT OBJECTIVE**

The fund seeks long-term capital appreciation and income.

#### **FUND COMMENTARY**

#### How did the fund perform in the past six months?

The Global Allocation Fund returned 7.97% in the six months ended April 30, 2019. The fund outperformed the Morningstar Global Allocation Index. (Returns for the Advisor and I Class shares varied slightly, reflecting their different fee structures. *Past performance cannot guarantee future results*.)

PERFORMANCE COMPARISON						
Six-Month Period Ended 4/30/19	Total Return					
Global Allocation Fund	7.97%					
Global Allocation Fund-Advisor Class	7.83					
Global Allocation Fund-I Class	8.05					
Morningstar Global Allocation Index	7.58					

#### What factors influenced the fund's performance?

Positive security selection within most of the underlying strategies drove relative outperformance, led by strong absolute and relative returns in the emerging markets, U.S. large-cap value, and U.S. large-cap growth equity portfolios. Within fixed income, the investment-grade and nondollar bond allocations also outpaced their respective benchmarks and boosted relative results.

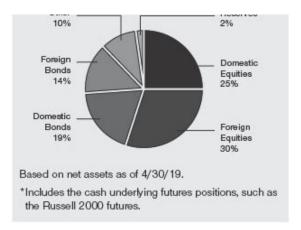

Overall, tactical decisions to overweight and underweight various asset classes within the fund added value. We took advantage of the sharp December sell-off to add to our exposure to equities, bringing our allocation to neutral, but have since moved modestly underweight after a significant rally. Persistent uncertainty surrounding global trade, geopolitical strife, and uneven economic growth may pose a headwind for equities.

Conversely, our out-of-benchmark allocation to alternatives detracted. While the conservative hedge fund of funds generated positive returns and outperformed cash, the allocation lagged global bonds and weighed on relative returns. However, the fund benefited from exposure to nondollar bonds and emerging markets bonds.

#### How is the fund positioned?

We currently maintain a modest underweight to equities. During the period, we opportunistically increased our equity allocation following the meaningful downturn in equity markets in late 2018, but we reduced our exposure following this year's strong rebound as we anticipate greater equity market volatility given persistent geopolitical and policy uncertainties. We continue to expect only modest returns from bonds, as the current low-yield environment offers a weak foundation for significant upside. Nevertheless, bonds offer diversification benefits and may be a buffer against challenging equity markets.

SECURITY DIVERSIFICATION	
Other	Reserves*

#### Stocks

On a regional basis, we have moderated our overweight to international equity markets. While their valuations are attractive, trade risks and softening growth trajectories could present challenges. Outside the U.S., we prefer emerging markets equities, which are supported by improving sentiment and offer compelling valuations with greater potential for appreciation relative to developed markets stocks. The U.S. market is less vulnerable to fading global economic growth, but moderating earnings growth, trade uncertainty, and elevated valuations pose headwinds.

In the U.S., we are overweight to growth stocks relative to value stocks. Although growth stocks have significantly outperformed value stocks for an extended period and are priced above historical averages, we believe that secular growth companies should continue to offer more durable growth in a slowing economic environment. On the other hand, value stocks lack a catalyst to advance, despite their fair valuations. We trimmed our overweight to U.S. small-caps relative to large-cap stocks following a period of strong performance. Valuations for small-cap stocks remain modestly attractive, but small companies are generally more vulnerable to late-cycle pressures given high leverage and rising wages. U.S. large-cap stocks face a relatively greater risk from protectionist trade policy, which could allow U.S. small-cap stocks to outperform in the near term.

Among international equities, we prefer growth over value stocks. Valuations for growth stocks are above historical averages, but with a quality bias, they are less exposed to a global growth slowdown. Value stocks are better priced but face pressure from persistently low interest rates and a softening growth trajectory, given their cyclical orientation and exposure to the financials sector. We are neutral to international small-cap stocks relative to international large-cap stocks. International large-caps rely heavily on the strength of global trade, and their upside depends on China's stimulus measures, which have been domestically focused. International small-caps are susceptible to domestic growth trends and face risks from heightened political uncertainty in key markets.

- \*Sources: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P.
- \*\*U.S. government agency securities are issued or guaranteed by a U.S. government agency and may include conventional pass-through securities and collateralized mortgage obligations; unlike Treasuries, government agency securities are not issued directly by the U.S. government and are generally unrated but may have credit support from the U.S. Treasury (e.g., FHLMC and FNMA issues) or

a direct government guarantee (e.g., GNMA issues). Therefore, this category may include rated and unrated securities.

\*\*\*U.S. Treasury securities are issued by the U.S. Treasury and are backed by the full faith and credit of the U.S. government. The ratings of U.S. Treasury securities are derived from the ratings on the U.S. government.

We remain underweight to inflation-sensitive real assets equities. In our view, moderating global growth and excess supply due to efficient oil and gas production by U.S. shale producers have created a challenging outlook for energy and commodity prices longer term. Real estate investment trusts, however, are buoyed by healthy fundamentals and a stable outlook for interest rates.

#### **Bonds**

Yields for U.S. investment-grade bonds remain low, with limited concerns from growth and higher inflation. Within fixed income, we have added to high yield bonds due to their yield advantage over investment-grade bonds. Despite the late stage of the credit cycle, high yield corporate fundamentals remain broadly positive, with low default expectations. We reduced our allocation to floating rate bank loans given weakened loan terms and the potential adverse impact of lower short-term interest rates on yields within the sector.

Low yields and long durations create a less attractive outlook for international investment-grade debt. For U.S. dollar-based investors, widening short-term rate differentials between U.S. and non-U.S. markets have led to more competitive hedged yields on bonds in Europe and Japan, but durations remain extended. Despite signs that economic growth may be softening in Europe, concerns over European Central Bank monetary policy and political risks remain. We reduced our overweight to U.S. dollar-denominated emerging markets sovereign debt. While yields are attractive, rising country-specific risks could result in near-term volatility. We have maintained an overweight to emerging markets local currency bonds, as many emerging markets currency valuations remain attractive in select areas, creating compelling opportunities.

#### What is portfolio management's outlook?

Risk assets had a strong start to the year as many of the fears that led to the fourth-quarter sell-off receded. The Federal Reserve's dovish pivot and overall optimism helped fuel an equity market rally, but the unresolved U.S.-China trade war and moderating earnings expectations could present challenges. With the tailwind from U.S. fiscal stimulus fading, the anticipated boost to long-term growth through capital expenditure has failed to materialize, as uncertainty has discouraged spending. In Europe, a softening growth trajectory and an accommodative European Central Bank on hold has contributed to a more supportive policy environment. However, unresolved Brexit negotiations and the region's vulnerability to trade risks and China's economy pose potential headwinds. China's stimulus measures—though domestically focused—combined with a more stable U.S. dollar should be supportive of emerging economies.

The shift in Fed policy and a broader easing of financial and liquidity conditions have reduced the near-term likelihood of a recession, but it leaves global central banks ill-equipped to respond to a more pronounced downturn. While a step back from tightening policies may help to stabilize global growth, it will not, in our view, be sufficient to ignite a reacceleration in growth. Near-term risks to global markets include repercussions from potential monetary policy missteps and an escalation in trade tensions.

Given the many crosscurrents that can influence global financial markets, we believe that the Global Allocation Fund's broad diversification, combined with strengths in our strategic investing approach, can add value over the long term and help mitigate downside risk in an uncertain market environment.

The views expressed reflect the opinions of T. Rowe Price as of the date of this report and are subject to change based on changes in market, economic, or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

#### **RISKS OF INVESTING**

As with all stock and bond mutual funds, the fund's share price can fall because of weakness in the stock or bond markets, a particular industry, or specific holdings. Stock markets can decline for many reasons, including adverse political or economic developments, changes in investor psychology, or heavy institutional selling. The prospects for an industry or company may deteriorate because of a variety of factors, including disappointing earnings or changes in the competitive environment. In addition, the investment manager's assessment of companies held in a fund may prove incorrect, resulting in losses or poor performance even in rising markets. A sizable cash or fixed income position may hinder the fund from participating fully in a strong, rapidly rising bull market. In addition, significant exposure to bonds increases the risk that the fund's share value could be hurt by rising interest rates or credit downgrades or defaults. Convertible securities are also exposed to price fluctuations of the company's stock.

#### **RISKS OF INTERNATIONAL INVESTING**

Funds that invest overseas generally carry more risk than funds that invest strictly in U.S. assets. Funds investing in a single country or in a limited geographic region tend to be riskier than more diversified funds. Risks can result from varying stages of economic and political development; differing regulatory environments, trading days, and accounting standards; and higher transaction costs of non-U.S. markets. Non-U.S. investments are also subject to currency risk, or a decline in the value of a foreign currency versus the U.S. dollar, which reduces the dollar value of securities denominated in that currency.

The risks of international investing are heightened for securities of issuers in emerging market countries. Emerging market countries tend to have economic structures that are less diverse and mature and political systems that are less stable than those of developed countries. In addition to all of the risks of investing in international developed markets, emerging markets are more susceptible to governmental interference, local taxes being imposed on international investments, restrictions on gaining access to sales proceeds, and less liquid and less efficient trading markets.

#### **RISKS OF INVESTING IN BONDS**

Funds that invest in bonds are subject to interest rate risk, the decline in bond prices that usually accompanies a rise in interest rates. Longer-maturity bonds typically decline more than those with shorter maturities. Funds that invest in bonds are also subject to credit risk, the chance that any fund holding could have its credit rating downgraded or that a bond issuer will default (fail to make timely payments of interest or principal), potentially reducing the fund's income level and share price.

#### **GROWTH OF \$10,000**

This chart shows the value of a hypothetical \$10,000 investment in the fund over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with benchmarks, which include a broad-based market index and may also include a peer group average or index. Market indexes do not include expenses, which are deducted from fund returns as well as mutual fund averages and indexes.

#### GLOBAL ALLOCATION FUND

Note: Performance for the Advisor and I Class shares will vary due to their differing fee structures. See the Average Annual Compound Total Return table.

#### **AVERAGE ANNUAL COMPOUND TOTAL RETURN**

	One	Five	Since	Inception
Periods Ended 4/30/19	Year	Years	Inception	Date

1 011000 611000 17 09 10	1001	1000	op.ioii	Duto
Global Allocation Fund	3.31%	5.72%	6.23%	5/28/13
Global Allocation Fund-Advisor Class	3.06	5.54	6.06	5/28/13
Global Allocation Fund-I Class	3.47	-	8.97	3/23/16

This table shows how the fund would have performed each year if its actual (or cumulative) returns for the periods shown had been earned at a constant rate. Returns do not reflect taxes that the shareholder may pay on fund distributions or the redemption of fund shares. Past performance cannot guarantee future results.

#### **EXPENSE RATIO**

1.09%
1.42
1.00

The expense ratio shown is as of the fund's fiscal year ended 10/31/18. This number may vary from the expense ratio shown elsewhere in this report because it is based on a different time period and, if applicable, includes acquired fund fees and expenses but does not include fee or expense waivers.

#### **FUND EXPENSE EXAMPLE**

As a mutual fund shareholder, you may incur two types of costs: (1) transaction costs, such as redemption fees or sales loads, and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other fund expenses. The following example is intended to help you understand your ongoing costs (in dollars) of investing in the fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the most recent six-month period and held for the entire period.

Please note that the fund has three share classes: The original share class (Investor Class) charges no distribution and service (12b-1) fee, the Advisor Class shares are offered only through unaffiliated brokers and other financial intermediaries and charge a 0.25% 12b-1 fee, and I Class shares are available to institutionally oriented clients and impose no 12b-1 or administrative fee payment. Each share class is presented separately in the table.

#### **Actual Expenses**

The first line of the following table (Actual) provides information about actual account values and expenses based on the fund's actual returns. You may use the information on this line, together with your account balance, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number on the first line under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

#### Hypothetical Example for Comparison Purposes

The information on the second line of the table (Hypothetical) is based on hypothetical account values and expenses derived from the fund's actual expense ratio and an assumed 5% per year rate of return before expenses (not the fund's actual return). You may compare the ongoing costs of investing in the fund with other funds by contrasting this 5% hypothetical example and the 5% hypothetical examples that appear in the shareholder reports of the other funds. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period.

Note: T. Rowe Price charges an annual account service fee of \$20, generally for accounts with less than \$10,000. The fee is waived for any investor whose T. Rowe Price mutual fund accounts total \$50,000 or more; accounts electing to receive electronic delivery of account statements, transaction confirmations, prospectuses, and shareholder reports; or accounts of an investor who is a T. Rowe Price Personal Services or Enhanced Personal Services client (enrollment in these programs generally requires T. Rowe Price assets of at least \$250,000). This fee is not included in the accompanying table. If you are subject to the fee, keep it in mind when you are estimating the ongoing expenses of investing in the fund and when comparing the expenses of this fund with other funds.

You should also be aware that the expenses shown in the table highlight only your ongoing costs and do not reflect any transaction costs, such as redemption fees or sales loads. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. To the extent a fund charges transaction costs, however, the total cost of owning that fund is higher.

<sup>‡</sup> Country classifications are generally based on MSCI categories or another unaffiliated third party data provider; Shares/Par and Notional Amount are denominated in the currency of the country presented unless otherwise noted.

<sup>(1)</sup> Non-income producing

- (2) Level 3 in fair value hierarchy. See Note 2.
- (3) Security was purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration only to qualified institutional buyers – total value of such securities at period-end amounts to \$13,409 and represents 1.9% of net assets.
- (4) All or a portion of this security is on loan at April 30, 2019. See Note 4.
- (5) Preferred stocks are shares that carry certain preferential rights. The dividend rate may not be consistent each pay period and could be zero for a particular year.
- (6) Organized as a closed-end management investment company.
- (7) Security cannot be offered for public resale without first being registered under the Securities Act of 1933 and related rules ("restricted security"). Acquisition date represents the day on which an enforceable right to acquire such security is obtained and is presented along with related cost in the security description. The fund has registration rights for certain restricted securities. Any costs related to such registration are borne by the issuer. The aggregate value of restricted securities (excluding 144A holdings) at periodend amounts to \$214 and represents 0.0% of net assets.
- (8) Security is a fix-to-float security, which carries a fixed coupon until a certain date, upon which it switches to a floating rate. Reference rate and spread is provided if the rate is currently floating.
- (9) Security is in default or has failed to make a scheduled interest and/or principal payment.
- (10) The issuer currently operates under a federal conservatorship; however, its securities are neither issued nor guaranteed by the U.S. government.
- (11) Issuer operates under a Congressional charter; its securities are neither issued nor quaranteed by the U.S. government.
- (12) At April 30, 2019, all or a portion of this security is pledged as collateral and/or margin deposit to cover future funding obligations.
- (13) All or a portion of this security is pledged to cover or as collateral for written call options at April 30, 2019.
- (14) SEC 30-day yield
- (15) Affiliated Companies
- (16) Seven-day yield

## AFFILIATED COMPANIES

(\$000s)

The fund may invest in certain securities that are considered attiliated companies. As defined by the 1940 Act, an affiliated company is one in which the fund owns 5% or more of the outstanding voting securities, or a company that is under common ownership or control. The following securities were considered affiliated companies for all or some portion of the six months ended April 30, 2019. Net realized gain (loss), investment income, change in net unrealized gain/loss, and purchase and sales cost reflect all activity for the period then ended.

Affiliate	Net Realized Ga (Los		Change in Net Unrealized Gain/Loss		Investment Income

# NOTES TO FINANCIAL STATEMENTS

T. Rowe Price Global Allocation Fund, Inc. (the fund) is registered under the Investment Company Act of 1940 (the 1940 Act) as a diversified, openend management investment company. The fund seeks long-term capital appreciation and income. The fund has three classes of shares: the Global Allocation Fund (Investor Class), the Global Allocation Fund—Advisor Class (Advisor Class), and the Global Allocation Fund—I Class (I Class). Advisor Class shares are sold only through unaffiliated brokers and other unaffiliated financial intermediaries. I Class shares require a \$1 million initial investment minimum, although the minimum generally is waived for retirement plans, financial intermediaries, and certain other accounts. The

Advisor Class operates under a Board-approved Rule 12b-1 plan pursuant to which the class compensates financial intermediaries for distribution, shareholder servicing, and/or certain administrative services; the Investor and I Classes do not pay Rule 12b-1 fees. Each class has exclusive voting rights on matters related solely to that class; separate voting rights on matters that relate to all classes; and, in all other respects, the same rights and obligations as the other classes.

#### **NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES**

Basis of Preparation The fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (FASB) *Accounting Standards Codificatio n* Topic 946 (ASC 946). The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), including, but not limited to, ASC 946. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity. Certain prior year amounts in the accompanying financial statements and financial highlights have been restated to conform to current year presentation.

Investment Transactions, Investment Income, and Distributions Investment transactions are accounted for on the trade date basis. Income and expenses are recorded on the accrual basis. Realized gains and losses are reported on the identified cost basis. Premiums and discounts on debt securities are amortized for financial reporting purposes. Paydown gains and losses are recorded as an adjustment to interest income. Inflation adjustments to the principal amount of inflation-indexed bonds are reflected as interest income. Income tax-related interest and penalties, if incurred, are recorded as income tax expense. Dividends received from mutual fund investments are reflected as dividend income; capital gain distributions are reflected as realized gain/loss. Dividend income and capital gain distributions are recorded on the ex-dividend date. Earnings on investments recognized as partnerships for federal income tax purposes reflect the tax character of such earnings. Distributions from REITs are initially recorded as dividend income and, to the extent such represent a return of capital or capital gain for tax purposes, are reclassified when such information becomes available. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid by each class annually. A capital gain distribution may also be declared and paid by the fund annually.

**Currency Translation** Assets, including investments, and liabilities denominated in foreign currencies are translated into U.S. dollar values each day at the prevailing exchange rate, using the mean of the bid and asked prices of such currencies against U.S. dollars as quoted by a major bank. Purchases and sales of securities, income, and expenses are translated into U.S. dollars at the prevailing exchange rate on the respective date of such transaction. The effect of changes in foreign currency exchange rates on realized and unrealized security gains and losses is not bifurcated from the portion attributable to changes in market prices.

Class Accounting Shareholder servicing, prospectus, and shareholder report expenses incurred by each class are charged directly to the class to which they relate. Expenses common to all classes, investment income, and realized and unrealized gains and losses are allocated to the classes based upon the relative daily net assets of each class. The Advisor Class pays Rule 12b-1 fees, in an amount not exceeding 0.25% of the class's average daily net assets.

**New Accounting Guidance** In March 2017, the FASB issued amended guidance to shorten the amortization period for certain callable debt securities held at a premium. The guidance is effective for fiscal years and interim periods beginning after December 15, 2018. Adoption will have no effect on the fund's net assets or results of operations.

**Indemnification** In the normal course of business, the fund may provide indemnification in connection with its officers and directors, service providers, and/or private company investments. The fund's maximum exposure under these arrangements is unknown; however, the risk of material loss is currently considered to be remote.

### **NOTE 2 - VALUATION**

The fund's financial instruments are valued and each class's net asset value (NAV) per share is computed at the close of the New York Stock Exchange (NYSE), normally 4 p.m. ET, each day the NYSE is open for business. However, the NAV per share may be calculated at a time other than the normal close of the NYSE if trading on the NYSE is restricted, if the NYSE closes earlier, or as may be permitted by the SEC.

Fair Value The fund's financial instruments are reported at fair value, which GAAP defines as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The T. Rowe Price Valuation Committee (the Valuation Committee) is an internal committee that has been delegated certain responsibilities by the fund's Board of Directors (the Board) to ensure that financial instruments are appropriately priced at fair value in accordance with GAAP and the 1940 Act. Subject to oversight by the Board, the Valuation Committee develops and oversees pricing-related policies and procedures and approves all fair value determinations. Specifically, the Valuation Committee establishes procedures to value securities; determines pricing techniques, sources, and persons eligible to effect fair value pricing actions; oversees the selection, services, and performance of pricing vendors; oversees valuation-related business continuity practices; and provides guidance on internal controls and valuation-related matters. The Valuation Committee reports to the Board and has representation from legal, portfolio management and trading, operations, risk management, and the fund's treasurer.

Various valuation techniques and inputs are used to determine the fair value of financial instruments. GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

Level 1 - quoted prices (unadjusted) in active markets for identical financial instruments that the fund can access at the reporting date

Level 2 – inputs other than Level 1 quoted prices that are observable, either directly or indirectly (including, but not limited to, quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in inactive markets, interest rates and yield curves, implied volatilities, and credit spreads)

Level 3 – unobservable inputs

Observable inputs are developed using market data, such as publicly available information about actual events or transactions, and reflect the assumptions that market participants would use to price the financial instrument. Unobservable inputs are those for which market data are not available and are developed using the best information available about the assumptions that market participants would use to price the financial instrument. GAAP requires valuation techniques to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. When multiple inputs are used to derive fair value, the financial instrument is assigned to the level within the fair value hierarchy based on the lowest-level input that is significant to the fair value of the financial instrument. Input levels are not necessarily an indication of the risk or liquidity associated with financial instruments at that level but rather the degree of judgment used in determining those values.

Valuation Techniques Equity securities listed or regularly traded on a securities exchange or in the over-the-counter (OTC) market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. OTC Bulletin Board securities are valued at the mean of the closing bid and asked prices. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. Listed securities not traded on a particular day are valued at the mean of the closing bid and asked prices for domestic securities and the last quoted sale or closing price for international securities.

For valuation purposes, the last quoted prices of non-U.S. equity securities may be adjusted to reflect the fair value of such securities at the close of the NYSE. If the fund determines that developments between the close of a foreign market and the close of the NYSE will affect the value of some or all of its portfolio securities, the fund will adjust the previous quoted prices to reflect what it believes to be the fair value of the securities as of the close of the NYSE. In deciding whether it is necessary to adjust quoted prices to reflect fair value, the fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The fund may also fair value securities in other situations, such as when a particular foreign market is closed but the fund is open. The fund uses outside pricing services to provide it with quoted prices and information to evaluate or adjust those prices. The fund cannot predict how often it will use quoted prices and how often it will determine it necessary to adjust those prices to reflect fair value. As a means of evaluating its security valuation process, the fund routinely compares quoted prices, the next day's opening prices in the same markets, and adjusted prices.

Actively traded equity securities listed on a domestic exchange generally are categorized in Level 1 of the fair value hierarchy. Non-U.S. equity securities generally are categorized in Level 2 of the fair value hierarchy despite the availability of quoted prices because, as described above, the fund evaluates and determines whether those quoted prices reflect fair value at the close of the NYSE or require adjustment. OTC Bulletin Board securities, certain preferred securities, and equity securities traded in inactive markets generally are categorized in Level 2 of the fair value hierarchy.

Debt securities generally are traded in the OTC market and are valued at prices furnished by dealers who make markets in such securities or by an independent pricing service, which considers the yield or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Generally, debt securities are categorized in Level 2 of the fair value hierarchy; however, to the extent the valuations include significant unobservable inputs, the securities would be categorized in Level 3.

Investments in mutual funds are valued at the mutual fund's closing NAV per share on the day of valuation and are categorized in Level 1 of the fair value hierarchy. Investments in private investment companies are valued at the investee's NAV per share as of the valuation date, if available. If the investee's NAV is not available as of the valuation date or is not calculated in accordance with GAAP, the Valuation Committee may adjust the investee's NAV to reflect fair value at the valuation date. Investments in private investment companies generally are categorized either in Level 2 or 3, depending on the significance of unobservable inputs. Listed options, and OTC options with a listed equivalent, are valued at the mean of the closing bid and asked prices and generally are categorized in Level 2 of the fair value hierarchy. Exchange-traded options on futures contracts are valued at closing settlement prices and generally are categorized in Level 1 of the fair value hierarchy. Financial futures contracts are valued at closing settlement prices and are categorized in Level 1 of the fair value hierarchy. Forward currency exchange contracts are valued using the prevailing forward exchange rate and are categorized in Level 2 of the fair value hierarchy. Assets and liabilities other than financial instruments, including short-term receivables and payables, are carried at cost, or estimated realizable value, if less, which approximates fair value.

Thinly traded financial instruments and those for which the above valuation procedures are inappropriate or are deemed not to reflect fair value are stated at fair value as determined in good faith by the Valuation Committee. The objective of any fair value pricing determination is to arrive at a price that could reasonably be expected from a current sale. Financial instruments fair valued by the Valuation Committee are primarily private placements, restricted securities, warrants, rights, and other securities that are not publicly traded.

Subject to oversight by the Board, the Valuation Committee regularly makes good faith judgments to establish and adjust the fair valuations of certain securities as events occur and circumstances warrant. For instance, in determining the fair value of an equity investment with limited market activity, such as a private placement or a thinly traded public company stock, the Valuation Committee considers a variety of factors, which may include, but are not limited to, the issuer's business prospects, its financial standing and performance, recent investment transactions in the issuer, new rounds of financing, negotiated transactions of significant size between other investors in the company, relevant market valuations of peer companies, strategic events affecting the company, market liquidity for the issuer, and general economic conditions and events. In consultation with the investment and pricing teams, the Valuation Committee will determine an appropriate valuation technique based on available information, which may include both observable and unobservable inputs. The Valuation Committee typically will afford greatest weight to actual prices in arm's length transactions, to the extent they represent orderly transactions between market participants, transaction information can be reliably obtained, and prices are deemed representative of fair value. However, the Valuation Committee may also consider other valuation methods such as marketbased valuation multiples; a discount or premium from market value of a similar, freely traded security of the same issuer; or some combination. Fair value determinations are reviewed on a regular basis and updated as information becomes available, including actual purchase and sale transactions of the issue. Because any fair value determination involves a significant amount of judgment, there is a degree of subjectivity inherent in such pricing decisions, and fair value prices determined by the Valuation Committee could differ from those of other market participants. Depending on the relative significance of unobservable inputs, including the valuation technique(s) used, fair valued securities may be categorized in Level 2 or 3 of the fair value hierarchy.

**Valuation Inputs** The following table summarizes the fund's financial instruments, based on the inputs used to determine their fair values on April 30, 2019 (for further detail by category, please refer to the accompanying Portfolio of Investments):

(\$000s)	Level 1		Level 2	Level 3	Total Value

Following is a reconciliation of the fund's Level 3 holdings for the six months ended April 30, 2019. Gain (loss) reflects both realized and change in unrealized gain/loss on Level 3 holdings during the period, if any, and is included on the accompanying Statement of Operations. The change in unrealized gain/loss on Level 3 instruments held at April 30, 2019, totaled \$1,302,000 for the six months ended April 30, 2019.

(\$000s)	В	eginning Balance 11/1/18	Ga	in (Loss) During Period	Pu	Total irchases	Total Sales	Ending Balance 4/30/19
Investments in Securit	ies

Convertible								
Preferred Stocks		19		1		63	-	83
Private Investment								
Companies	0000	64,493		1,248		5,850	 (5,700)	 65,891
Total Level 3	\$	64,562	\$	1,249	\$	5,994	\$ (5,700)	\$ 66,105

In accordance with GAAP, the following table provides quantitative information about significant unobservable inputs used to determine the fair valuations of the fund's Level 3 assets, by class of financial instrument; it also indicates the sensitivity of the Level 3 valuations to changes in those significant unobservable inputs. Because the Valuation Committee considers a wide variety of factors and inputs, both observable and unobservable, in determining fair values, the unobservable inputs presented do not reflect all inputs significant to the fair value determination.

(\$000s)	Market Value (000s)	Valuation Technique(s)+	Significant Unobservable Input(s)	Value or Range of Input(s)	Impact to Valuation from an Increase in Input*
Investments in Securities					
Common Stock	\$ 131	Recent comparable transaction price(s)	-#	-#	-#
			D: .	4000/	-

			Discount for lack of collectability	100%	Decrease
Convertible Preferred Stocks	\$ 83	Recent comparable transaction price(s)	-#	-#	-#
Private Investment Companies	\$ 65,891	Rollforward of Investee NAV	Estimated return	0.40%	Increase

- #No quantitative unobservable inputs significant to the valuation technique were created by the fund's management.
- \*Represents the directional change in the fair value of the Level 3 investment(s) that would result from an increase in the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.
- +Valuation techniques may change in order to reflect management's judgment of current market participant assumptions.

#### **NOTE 3 - DERIVATIVE INSTRUMENTS**

During the six months ended April 30, 2019, the fund invested in derivative instruments. As defined by GAAP, a derivative is a financial instrument whose value is derived from an underlying security price, foreign exchange rate, interest rate, index of prices or rates, or other variable; it requires little or no initial investment and permits or requires net settlement. The fund invests in derivatives only if the expected risks and rewards are consistent with its investment objectives, policies, and overall risk profile, as described in its prospectus and Statement of Additional Information. The fund may use derivatives for a variety of purposes, such as seeking to hedge against declines in principal value, increase yield, invest in an asset with greater efficiency and at a lower cost than is possible through direct investment, to enhance return, or to adjust credit exposure. The risks associated with the use of derivatives are different from, and potentially much greater than, the risks associated with investing directly in the instruments on which the derivatives are based. The fund at all times maintains sufficient cash reserves, liquid assets, or other SEC-permitted asset types to cover its settlement obligations under open derivative contracts.

The fund values its derivatives at fair value and recognizes changes in fair value currently in its results of operations. Accordingly, the fund does not follow hedge accounting, even for derivatives employed as economic hedges. Generally, the fund accounts for its derivatives on a gross basis. It does not offset the fair value of derivative liabilities against the fair value of derivative assets on its financial statements, nor does it offset the fair value of derivative instruments against the right to reclaim or obligation to return collateral.

The following table summarizes the fair value of the fund's derivative instruments held as of April 30, 2019, and the related location on the accompanying Statement of Assets and Liabilities, presented by primary underlying risk exposure:

(\$000s)	Location on Statement of Assets and Liabilities		Fair Value
Assets			
Interest rate derivatives	Futures*	\$	26
Foreign exchange derivatives	Forwards		308
Equity derivatives	Futures*		1,251
Total		\$	1,585
Liabilities			
Interest rate derivatives	Futures*, Options written	\$	37
Foreign exchange derivatives	Forwards		36
Equity derivatives	Options written, Futures*	numus.	471
Total		\$	544

<sup>\*</sup>The fair value presented includes cumulative gain (loss) on open futures contracts; however, the value reflected on the accompanying Statement of Assets and Liabilities is only the unsettled variation margin receivable (payable) at that date.

Additionally, the amount of gains and losses on derivative instruments recognized in fund earnings during the six months ended April 30, 2019, and the related location on the accompanying Statement of Operations is summarized in the following table by primary underlying risk exposure:

(\$000s)	Location of Gain (Loss) on Statement of Operations

Total	\$	43	\$	199	\$ 4,235	\$ (388)	\$	4,089

<sup>^</sup>Options purchased are reported as securities.

Counterparty Risk and Collateral The fund invests in derivatives in various markets, which expose it to differing levels of counterparty risk. Counterparty risk on exchange-traded and centrally cleared derivative contracts, such as futures, exchange-traded options, and centrally cleared swaps, is minimal because the clearinghouse provides protection against counterparty defaults. For futures and centrally cleared swaps, the fund is required to deposit collateral in an amount specified by the clearinghouse and the clearing firm (margin requirement), and the margin requirement must be maintained over the life of the contract. Each clearinghouse and clearing firm, in its sole discretion, may adjust the margin requirements applicable to the fund.

Derivatives, such as bilateral swaps, forward currency exchange contracts, and OTC options, that are transacted and settle directly with a counterparty (bilateral derivatives) may expose the fund to greater counterparty risk. To mitigate this risk, the fund has entered into master netting arrangements (MNAs) with certain counterparties that permit net settlement under specified conditions and, for certain counterparties, also require the exchange of collateral to cover mark-to-market exposure. MNAs may be in the form of International Swaps and Derivatives Association master agreements (ISDAs) or foreign exchange letter agreements (FX letters).

MNAs provide the ability to offset amounts the fund owes a counterparty against amounts the counterparty owes the fund (net settlement). Both ISDAs and FX letters generally allow termination of transactions and net settlement upon the occurrence of contractually specified events, such as failure to pay or bankruptcy. In addition, ISDAs specify other events, the occurrence of which would allow one of the parties to terminate. For example, a downgrade in credit rating of a counterparty below a specified rating would allow the fund to terminate, while a decline in the fund's net assets of more than a specified percentage would allow the counterparty to terminate. Upon termination, all transactions with that counterparty would be liquidated and a net termination amount settled. ISDAs include collateral agreements whereas FX letters do not. Collateral requirements are determined daily based on the net aggregate unrealized gain or loss on all bilateral derivatives with a counterparty, subject to minimum transfer amounts that typically range from \$100,000 to \$250,000. Any additional collateral required due to changes in security values is typically transferred the same business day.

Collateral may be in the form of cash or debt securities issued by the U.S. government or related agencies. Cash posted by the fund is reflected as cash deposits in the accompanying financial statements and generally is restricted from withdrawal by the fund; securities posted by the fund are so noted in the accompanying Portfolio of Investments; both remain in the fund's assets. Collateral pledged by counterparties is not included in the fund's assets because the fund does not obtain effective control over those assets. For bilateral derivatives, collateral posted or received by the fund is held in a segregated account at the fund's custodian. While typically not sold in the same manner as equity or fixed income securities, exchange-traded or centrally cleared derivatives may be closed out only on the exchange or clearinghouse where the contracts were traded, and OTC and bilateral derivatives may be unwound with counterparties or transactions assigned to other counterparties to allow the fund to exit the transaction. This ability is subject to the liquidity of underlying positions. As of April 30, 2019, no collateral had been posted by the fund to counterparties for bilateral derivatives. As of April 30, 2019, collateral pledged by counterparties to the fund for bilateral derivatives consisted of \$310,000 cash. As of April 30, 2019, securities valued at \$12,300,000 had been posted by the fund for exchange-traded and/or centrally cleared derivatives.

Forward Currency Exchange Contracts The fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. It uses forward currency exchange contracts (forwards) primarily to protect its non-U.S. dollar-denominated securities from adverse currency movements. A forward involves an obligation to purchase or sell a fixed amount of a specific currency on a future date at a price set at the time of the contract. Although certain forwards may be settled by exchanging only the net gain or loss on the contract, most forwards are settled with the exchange of the underlying currencies in accordance with the specified terms. Forwards are valued at the unrealized gain or loss on the contract, which reflects the net amount the fund either is entitled to receive or obligated to deliver, as measured by the difference between the forward exchange rates at the date of entry into the contract and the forward rates at the reporting date. Appreciated forwards are reflected as assets and depreciated forwards are reflected as liabilities on the accompanying Statement of Assets and Liabilities. Risks related to the use of forwards include the possible failure of counterparties to meet the terms of the agreements; that anticipated currency movements will not occur, thereby reducing the fund's total return; and the potential for losses in excess of the fund's initial investment. During the six months ended April 30, 2019, the volume of the fund's activity in forwards, based on underlying notional amounts, was generally between 5% and 7% of net assets.

**Futures Contracts** The fund is subject to interest rate risk and equity price risk in the normal course of pursuing its investment objectives and uses futures contracts to help manage such risks. The fund may enter into futures contracts to manage exposure to interest rates, security prices, foreign currencies, and credit quality; as an efficient means of adjusting exposure to all or part of a target market; to enhance income; as a cash management tool; or to adjust credit exposure. A futures contract provides for the future sale by one party and purchase by another of a specified

amount of a specific underlying financial instrument at an agreed upon price, date, time, and place. The fund currently invests only in exchange-traded futures, which generally are standardized as to maturity date, underlying financial instrument, and other contract terms. Payments are made or received by the fund each day to settle daily fluctuations in the value of the contract (variation margin), which reflect changes in the value of the underlying financial instrument. Variation margin is recorded as unrealized gain or loss until the contract is closed. The value of a futures contract included in net assets is the amount of unsettled variation margin; net variation margin receivable is reflected as an asset and net variation margin payable is reflected as a liability on the accompanying Statement of Assets and Liabilities. Risks related to the use of futures contracts include possible illiquidity of the futures markets, contract prices that can be highly volatile and imperfectly correlated to movements in hedged security values and/or interest rates, and potential losses in excess of the fund's initial investment. During the six months ended April 30, 2019, the volume of the fund's activity in futures, based on underlying notional amounts, was generally between 7% and 10% of net assets.

**Options** The fund is subject to interest rate risk and equity price risk in the normal course of pursuing its investment objectives and uses options to help manage such risks. The fund may use options to manage exposure to security prices, interest rates, foreign currencies, and credit quality; as an efficient means of adjusting exposure to all or a part of a target market; to enhance income; as a cash management tool; or to adjust credit exposure. Options are included in net assets at fair value, options purchased are included in Investments in Securities, and options written are separately reflected as a liability on the accompanying Statement of Assets and Liabilities. Premiums on unexercised, expired options are recorded as realized gains or losses; premiums on exercised options are recorded as an adjustment to the proceeds from the sale or cost of the purchase. The difference between the premium and the amount received or paid in a closing transaction is also treated as realized gain or loss. In return for a premium paid, call and put options give the holder the right, but not the obligation, to purchase or sell, respectively, a security at a specified exercise price. In return for a premium paid, call and put options on futures give the holder the right, but not the obligation, to purchase or sell, respectively, a position in a particular futures contract at a specified exercise price. In return for a premium paid, call and put index options give the holder the right, but not the obligation, to receive cash equal to the difference between the value of the reference index on the exercise date and the exercise price of the option. Risks related to the use of options include possible illiquidity of the options written, potential losses in excess of the fund's initial investment. During the six months ended April 30, 2019, the volume of the fund's activity in options, based on underlying notional amounts, was generally between 9% and 13% of net assets.

#### **NOTE 4 - OTHER INVESTMENT TRANSACTIONS**

Consistent with its investment objective, the fund engages in the following practices to manage exposure to certain risks and/or to enhance performance. The investment objective, policies, program, and risk factors of the fund are described more fully in the fund's prospectus and Statement of Additional Information.

Emerging and Frontier Markets The fund may invest, either directly or through investments in T. Rowe Price institutional funds, in securities of companies located in, issued by governments of, or denominated in or linked to the currencies of emerging and frontier market countries; at periodend, approximately 15% of the fund's net assets were invested in emerging markets and 3% in frontier markets. Emerging markets, and to a greater extent frontier markets, generally have economic structures that are less diverse and mature, and political systems that are less stable, than developed countries. These markets may be subject to greater political, economic, and social uncertainty and differing regulatory environments that may potentially impact the fund's ability to buy or sell certain securities or repatriate proceeds to U.S. dollars. Such securities are often subject to greater price volatility, less liquidity, and higher rates of inflation than U.S. securities. Investing in frontier markets is significantly riskier than investing in other countries, including emerging markets.

**Restricted Securities** The fund may invest in securities that are subject to legal or contractual restrictions on resale. Prompt sale of such securities at an acceptable price may be difficult and may involve substantial delays and additional costs.

Securities Lending The fund may lend its securities to approved borrowers to earn additional income. Its securities lending activities are administered by a lending agent in accordance with a securities lending agreement. Security loans generally do not have stated maturity dates, and the fund may recall a security at any time. The fund receives collateral in the form of cash or U.S. government securities. Collateral is maintained over the life of the loan in a n a m ou nt n ot less than the value of loaned securities; any additional collateral is maintained over the life of the loan in a n a m ount n ot less than the value of loaned securities; any additional collateral is invested in accord ance with investment guidelines approved by fund manage ment. Additionally, the lending agentindemnifies the fund agains tlosses resulting from borrowerdeful. Although risk is mitigated by the collateral and indemnification, the fund could experience adelayin recovering its securities and a possible loss of incomeorvalue if the borrowerfails to return the securities, collateral investments decline invalue, and the lending agent fails to perform. Securities lending revenue consists of earnings on invested collateral and borrowing fees, net of any rebates to the borrower, compensation to the lending agent, and otheradministrative costs. In accord ance with GAAP, investments made with cash collateral are reflected in the accompanying financial statements, but collateral received in the form of securities is not. At April 30, 2019, the value of loaned securities was \$3,058,000; the value of cash collateral and related investments was \$3,179,000.

Mortgage-Backed Securities The fund may investin mort gage - backed securities (MBSorpass-through certificates) that represent an interestin a pool of specific underlying mort gage loans and entitle the fund to the periodic payments of principal and interest from those mort gages. MBS may be issued by government agencies or corporations, or private issuers. Most MBS issued by government agencies are guaranteed; however, the degree of protection differs based on the issuer. MBS are sensitive to changes in economic conditions that affect the rate of prepayments and defaults on the underlying mort gages; accordingly, the value, in come, and related cash flows from MBS may be more volatile than other debtinstruments.

Investment in Blackstone Partners Offshore Fund The fundinvested in Blacks tone Partners Offshore Fund Ltd. (Blacks tone Partners), a multi-strategy hedgefund-of-funds offered by Blacks tone Alternative Asset Management (BAAM), a unitof Blacks tone Group L.P. (Blacks tone). Blacks tone Partners provides fundex posure to alternative investments primarily through Blacks tone Partners' investments in underlying private investment funds, and the underlying fund

s a r e m os tl y m a n age d by i nv es tm e nt m a n age r s u n a ffiliate d with B AAM or B lacks to n e. B lacks to n e Partn ers and the u nd erl yi n g f u nd s m ay use leverage, en gage in short-selling, and investin commodities or other speculative investments, which may increase the risk of investment loss. B lacks to n e Partn ers and the underlying f unds are not subject to the same regulatory requirements as openendmutual f unds, and, therefore, their investments and related valuations may not be as transparent. Own ership interests in B lacks to ne Partn ers are not transferable and are subject to var ious redemption restrictions, such as a dvancenotice requirements, limited redemption dates, and possible suspension of redemption rights. In addition, B lacks tone Partn ers' own ership in the underlying f unds may also be subject to transferandredemption restrictions, such as advancenotice requirements, limited redemption dates, and possible suspension of redemption rights. All of these restrictions are subject to change at the solediscretion of B lacks tone Partn ers or an underlying f und's management. As of April 30, 2019, the f und's investment in B lacks tone Partn ers is subject to semi-annual redemption with 95 days prior writtennotice and is considered an illiquid asset.

Other Pur chases and sales of portfolio securities otherthan short-term and U.S. government securities aggregated \$173, 418,000 and \$110,561,000, respectively, for the six months ended April 30, 2019. Pur chases and sales of U.S. government securities aggregated \$33,034,000 and \$33,356,000, respectively, for the six months ended April 30, 2019.

## **NOTE 5 - FEDERAL INCOME TAXES**

Noprovision forfederalin cometaxes is required since the fundintends to continue to qualify as a regulated investment company under Subchapter Mofthe Internal Revenue Code and distribute to shareholders all of its taxable in come and gains. Distributions determined in accordance with federalin cometax regulations may differ in a mount or character from netinvestment in come and realized gains for financial reporting purposes. Financial reporting records are adjusted for permanent book /tax differences to reflect tax character but are not adjusted for temporary differences. The amount and character of tax-basis distributions and composition of net assets are finalized at fiscal year-end; accordingly, tax-basis balances havenot been determined as of the date of this report.

The fundintendstoretainrealized gainstotheextentofavailable capitalloss carryforwards. Netrealized capitallosses may be carried forwardindefinitely to off setfuturerealized capitalgains. AsofOctober31,2018, the fund had \$1,704,000 of available capitalloss carryforwards.

At A pril 30, 2019, the cost of investments for federalin cometax purposes was \$635,087,000. Net unrealized gain aggregated \$53,402,000 at period-end, of which \$74,972,000 related to appreciated investments and \$21,570,000 related to depreciated investments.

### **NOTE 6 - FOREIGN TAXES**

The fund is subject to foreignin cometaxes imposed by certain countries in which it invests. Add it ionally, certain foreign currency transactions are subject to tax, and capital gains realized upond isposition of securities issued in or by certain foreign countries are subject to capital gains taxim posed by those countries. All taxes are computed in accordance with the applicable foreigntaxlaw, and, to the extent permitted, capitallosses are used to off set capital gains. Taxes attributable to incomeare accrued by the fund as are duction of income. Taxes in curred on the purchase of foreign currencies are recorded as realized loss on foreign currency transactions. Current and deferred taxexpense attributable to capital gains is reflected as a component of realized or change in unrealized gain/loss on securities in the accompany in gfinancial statements. At April 30, 2019, the fund had node ferred tax liability attributable to foreign securities and \$23,000 of foreign capital loss carry forwards that expire in 2027.

# **NOTE 7 - RELATED PARTY TRANSACTIONS**

The fund is managed by T. Rowe Price Associates, In c. (Price Associates), a wholly owned subsidiary of T. Rowe Price Group, In c. (Price Group). The investment management agreement be tween the fund and Price Associates provides for an annual investment management fee, which is computed daily and paid monthly. The fee consists of an individual fund fee, equal to 0.40% of the fund 's averaged aily net assets, and agroup fee. The group feerate is calculated based on the combined net assets of certain mutual funds sponsored by Price Associates (the group) applied to agraduated fee schedule, with rates ranging from 0.48% for the first\$1 billion of assets to 0.265% for assets in excess of \$650 billion. The fund 's group fee is determined by applying the group fee rate to the fund 's averaged aily net assets. At April 30, 2019, the effective annual group feerate was 0.29%.

The Adv isorClass is subject to a contractualex penselimitationthrough the limitation dateindicated in the table below. During the limitation period, Price Associates is required to waiveits management fee or pay anyexpenses (excluding interest, expenses related to borrowings, taxes, brokerage, and othernon-recurringexpenses permitted by the investment management agreement) that would otherwise cause the class's ratio of annualized to talexpenses to a veragenet assets (netexpenseratio) to exceed its expenselimitation. The class is required to repay Price Associates for expenses previously waived/paid to the extent the class's net assets groworexpenses declines ufficiently to allow repay ment without causing the class's netexpenseratio (after the repay ment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such a mounts were waived; or (2) the class's current expense limitation. However, norepay ment will be made more than three years after the date of a pay ment or waiver.

The IClass is also subject to an operating expense limitation (IClass Limit) pursuant to which Price Associates is contractually required to pay all operating expenses of the IClass, excluding management fees, interest, expenses related to borrowings, taxes, brokerage, and othernon-recurring expenses permitted by the investment management agreement, to the extent such operating expenses, on an annualized basis, exceed the IClass Limit. This agreement will continue through the limitation date indicated in the table below, and may be renewed, revised, orrevoked only wi

th approvalofthefund's Board. The IClass is required to repay Price A ssociates for expenses previously paid to the extent the class's net assets groworexpenses decline sufficiently to allow repay ment without causing the class's operating expenses (after the repay ment is taken into account) to exceed the lesser of: (1) the IClass Limitinplace at the time such a mounts were paid; or (2) the current IClass Limit. However, no repay ment will be made more than three years after the date of a pay ment or waiver.

Pur suant to these agreements, expenses were waived/paid by and/orrepaid to Price Associates during the sixmonths ended April 30, 2019 as indicated in the table below. In cluding these amounts, expenses previously waived/paid by Price Associates in the amount of \$771,000 remain subject to repayment by the fundat April 30, 2019. To the extent any expenses are waivedorreim bursed in accordance with anexpenselimitation, the waiverorreim bursement is charged to the applicable class or allocated across the classes in the samemanner as the related expense. Any repayment of expenses previously waived/paid by Price Associates during the period, if any, would be included in the net investment in come and expense ratios presented on the accompanying Financial High lights.

	Investor Class	Advisor Class	I Class
Expense limitation/I Class Limit	N/A	1.15%	0.05%
Limitation date	N/A	02/29/20	02/29/20
(Waived)/repaid during the period (\$000s)	\$(76)	\$(2)	\$(9)

In a dd it ion, the fund has enteredinto service agreements with Price Associates and two wholly owned subsidiaries of Price Associates, each an affiliate of the fund (collectively, Price). Price Associates provides certain accounting and administrative services to the fund. T. Rowe Price Services, Inc. provides shareholder and administrative services in its capacity as the fund's transferand dividend-disbursing agent. T. Rowe Price Retirement PlanServices, Inc. provides subaccounting and record keeping services forcertain retirement accounts invested in the Investor Class. For the six months ended April 30, 2019, expenses in curred pursuant to these service agreements were \$34,000 for Price Associates; \$53,000 for T. Rowe Price Services, Inc.; and \$1,000 for T. Rowe Price Retirement PlanServices, Inc. All amounts due to and due from Price, exclusive of investment management fees payable, are presented neton the accompanying Statement of Assets and Liabilities.

The fund may investits cash reserves in certain open-end managementinves tment companies managed by Price Associates and considered affiliates of the fund: the T. Rowe Price Government Reserve Fundorthe T. Rowe Price Treasury Reserve Fund, organized as money market funds, or the T. Rowe Price Short-Term Fund, a short-term bond fund (collectively, the Price Reserve Funds). The Price Reserve Funds are offered as short-term investment option stomutual funds, trusts, and other accounts managed by Price Associates or its affiliates and are not available for direct purchase by members of the public. Cash collateral from securities lending is invested in the T. Rowe Price Short-Term Fund. The Price Reserve Funds pay no investment management fees.

The fund may also investincertain other T. Rowe Price funds (Price Funds) as a means of gaining efficient and cost-effective exposure to certain markets. The fund doesnotinvest for the purpose of exercising managementor control; however, investments by the fund may represent a significant portion of a nunderlying Price Fund's netassets. Each underlying Price Fund is an open-end management investment company managed by Price Associates and is considered an affiliate of the fund. To ensure that the fund doesnotin curd uplicate management fees (paid by the underlying Price Fund (s) and the fund), Price Associates has agreed to permanently waive aportion of its management fee charged to the fundinanamount sufficient to fully off set that portion of management fees paid by each underlying Price Fund (s) for the six months ended April 30, 2019, are asfollows:

(\$000s)	Effective Management Fee Rate	Management Fee Waived
T. Rowe Price Dynamic Global Bond Fund	0.49%	\$ 30
T. Rowe Price Emerging Markets Local Currency Bond Fund	0.74%	66
T. Rowe Price Institutional Emerging Markets Bond Fund	0.70%	94
T. Rowe Price Institutional Floating Rate Fund	0.55%	22
T. Rowe Price Institutional Frontier Markets Equity Fund	1.10%	18
T. Rowe Price Institutional High Yield Fund	0.50%	26
T. Rowe Price Institutional International Bond Fund	0.55%	5
T. Rowe Price International Bond Fund (USD Hedged)	0.49%	8
T. Rowe Price International Bond Fund	0.49%	37
T. Rowe Price Ultra Short-Term Bond Fund	0.30%	33
Total Management Fee Waived		\$339

Totalman age mentfee waived was allocatedratably in the amounts of \$305,000, \$6,000 and \$28,000 for Investor Class, Advisor Class and I Class, respectively, for the six months ended April 30, 2019.

As of April 30, 2019, T. Rowe Price Group, In c., orits wholl yowned subsidiaries owned 15, 533,000 shares of the Investor Class, representing 32% of the Investor Class's net assets.

The fund may participate in securities purchase and sale transactions withotherfunds or accounts a dvised by Price A ssociates (cross trades), in accordance with procedures adopted by the fund's Board and Securities and Exchange Commission rules, which require, amongotherthings, that such purchase and sale cross trades be effected at the independent current market price of the security. During the six months ended April 30, 2019, the fund had no purchases or sales cross trades withotherfunds or accounts advised by Price Associates.

## INFORMATION ON PROXY VOTING POLICIES, PROCEDURES, AND RECORDS

A description of the policies and procedures used by T. Rowe Price funds and portfolios to determine how to vote proxies relating to portfolio securities is available in each fund's Statement of Additional Information. You may request this document by calling 1-800-225-5132 or by accessing the SEC's website, sec.gov.

The description of our proxy voting policies and procedures is also available on our corporate website. To access it, please visit the following Web page:

https://www3.troweprice.com/usis/corporate/en/utility/policies.html

Each fund's most recent annual proxy voting record is available on our website and through the SEC's website. To access it through T. Rowe Price, visit the website location shown above, and scroll down to the section near the bottom of the page that says, "Proxy Voting Records." Click on the Proxy Voting Records link in the shaded box.

#### **HOW TO OBTAIN QUARTERLY PORTFOLIO HOLDINGS**

Effective for reporting periods on or after March 1, 2019, the fund files a complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Prior to March 1, 2019, the fund filed a complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The fund's Forms N-PORT and N-Q are available electronically on the SEC's website (sec.gov).

#### APPROVAL OF INVESTMENT MANAGEMENT AGREEMENT

Each year, the fund's Board of Directors (Board) considers the continuation of the investment management agreement (Advisory Contract) between the fund and its investment advisor, T. Rowe Price Associates, Inc. (Advisor), on behalf of the fund. In that regard, at an in-person meeting held on March 11–12, 2019 (Meeting), the Board, including a majority of the fund's independent directors, approved the continuation of the fund's Advisory Contract. At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of the Advisory and the approval of the Advisory Contract. The independent directors were assisted in their evaluation of the Advisory Contract by independent legal counsel from whom they received separate legal advice and with whom they met separately.

In providing information to the Board, the Advisor was guided by a detailed set of requests for information submitted by independent legal counsel on behalf of the independent directors. In considering and approving the Advisory Contract, the Board considered the information it believed was relevant, including, but not limited to, the information discussed below. The Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interaction with the Advisor about various topics. The Board meets regularly and, at each of its meetings, covers an extensive agenda of topics and materials and considers factors that are relevant to its annual consideration of the renewal of the T. Rowe Price funds' advisory contracts, including performance and the services and support provided to the funds and their shareholders.

## Services Provided by the Advisor

The Board considered the nature, quality, and extent of the services provided to the fund by the Advisor. These services included, but were not limited to, directing the fund's investments in accordance with its investment program and the overall management of the fund's portfolio, as well as a variety of related activities, such as financial, investment operations, and administrative services; compliance; maintaining the fund's records and registrations; and shareholder communications. The Board also reviewed the background and experience of the Advisor's senior management team and investment personnel involved in the management of the fund, as well as the Advisor's compliance record. The Board concluded that it was satisfied with the nature, quality, and extent of the services provided by the Advisor.

### Investment Performance of the Fund

The Board took into account discussions with the Advisor and reports that it receives throughout the year relating to fund performance. In connection with the Meeting, the Board reviewed the fund's net annualized total returns for the 1-, 2-, 3-, 4-, and 5-year periods as of September 30, 2018, and compared these returns with the performance of a peer group of funds with similar investment programs and a wide variety of other previously agreed-upon comparable performance measures and market data, including those supplied by Broadridge, which is an independent provider of mutual fund data.

On the basis of this evaluation and the Board's ongoing review of investment results, and factoring in the relative market conditions during certain of the performance periods, the Board concluded that the fund's performance was satisfactory.

### Costs, Benefits, Profits, and Economies of Scale

The Board reviewed detailed information regarding the revenues received by the Advisor under the Advisory Contract and other benefits that the Advisor (and its affiliates) may have realized from its relationship with the fund, including any research received under "soft dollar" agreements and commission-sharing arrangements with broker-dealers. The Board considered that the Advisor may receive some benefit from soft-dollar arrangements pursuant to which research is received from broker-dealers that execute the fund's portfolio transactions. The Board received information on the estimated costs incurred and profits realized by the Advisor from managing the T. Rowe Price funds. The Board also reviewed estimates of the profits realized from managing the fund in particular, and the Board concluded that the Advisor's profits were reasonable in light of the services provided to the fund.

The Board also considered whether the fund benefits under the fee levels set forth in the Advisory Contract from any economies of scale realized by the Advisor. Under the Advisory Contract, the fund pays a fee to the Advisor for investment management services composed of two components—a group fee rate based on the combined average net assets of most of the T. Rowe Price funds (including the fund) that declines at certain asset levels and an individual fund fee rate based on the fund's average daily net assets—and the fund pays its own expenses of operations (subject to contractual expense limitations agreed to by the Advisor with respect to the Advisor Class and I Class). The Board concluded that the advisory fee structure for the fund continued to provide for a reasonable sharing of benefits from any economies of scale with the fund's investors.

### Fees and Expenses

The Board was provided with information regarding industry trends in management fees and expenses. Among other things, the Board reviewed data for peer groups that were compiled by Broadridge, which compared: (i) contractual management fees, total expenses, actual management fees, and nonmanagement expenses of the Investor Class of the fund with a group of competitor funds selected by Broadridge (Investor Class Expense Group); (ii) total expenses and actual management fees of the Advisor Class of the fund with a group of competitor funds selected by Broadridge (Advisor Class Expense Group); and (iii) total expenses, actual management fees, and nonmanagement expenses of the Investor Class of the fund with a broader set of funds within the Lipper investment classification (Expense Universe). The Board considered the fund's contractual management fee rate, actual management fee rate (which reflects the management fees actually received from the fund by the Advisor after any applicable waivers, reductions, or reimbursements), operating expenses, and total expenses (which reflects the net total expense ratio of the fund after any waivers, reductions, or reimbursements) in comparison with the information for the Broadridge peer groups. Broadridge generally constructed the peer groups by seeking the most comparable funds based on similar investment classifications and objectives, expense structure, asset size, and operating components and attributes and ranked funds into quintiles, with the first quintile representing the funds with the highest relative expenses. The information provided to the Board indicated that the fund's contractual management fee ranked in the first quintile (Investor Class Expense Group), the fund's actual management fee rate ranked in the first quintile (Investor Class Expense Group), first quintile (Advisor Class Expense Group), and the fund's total expenses ranked in the first and second quintiles (Investor Class Expense Group), first quintile (Advisor Class Expense Group), and third quintil

The Board also reviewed the fee schedules for institutional accounts and private accounts with similar mandates that are advised or subadvised by the Advisor and its affiliates. Management provided the Board with information about the Advisor's responsibilities and services provided to subadvisory and other institutional account clients, including information about how the requirements and economics of the institutional business are fundamentally different from those of the mutual fund business. The Board considered information showing that the Advisor's

mutual fund business is generally more complex from a business and compliance perspective than its institutional account business and considered various relevant factors, such as the broader scope of operations and oversight, more extensive shareholder communication infrastructure, greater asset flows, heightened business risks, and differences in applicable laws and regulations associated with the Advisor's proprietary mutual fund business. In assessing the reasonableness of the fund's management fee rate, the Board considered the differences in the nature of the services required for the Advisor to manage its mutual fund business versus managing a discrete pool of assets as a subadvisor to another institution's mutual fund or for an institutional account and that the Advisor generally performs significant additional services and assumes greater risk in managing the fund and other T. Rowe Price funds than it does for institutional account clients.

On the basis of the information provided and the factors considered, the Board concluded that the fees paid by the fund under the Advisory Contract are reasonable.

#### Approval of the Advisory Contract

As noted, the Board approved the continuation of the Advisory Contract. No single factor was considered in isolation or to be determinative to the decision. Rather, the Board concluded, in light of a weighting and balancing of all factors considered, that it was in the best interests of the fund and its shareholders for the Board to approve the continuation of the Advisory Contract (including the fees to be charged for services thereunder).

# Item 1. (b) Notice pursuant to Rule 30e-3.

Not applicable.

## Item 2. Code of Ethics.

A code of ethics, as defined in Item 2 of Form N-CSR, applicable to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions is filed as an exhibit to the registrant's annual Form N-CSR. No substantive amendments were approved or waivers were granted to this code of ethics during the registrant's most recent fiscal half-year.

# Item 3. Audit Committee Financial Expert.

Disclosure required in registrant's annual Form N-CSR.

# Item 4. Principal Accountant Fees and Services.

Disclosure required in registrant's annual Form N-CSR.

# Item 5. Audit Committee of Listed Registrants.

Not applicable.

#### Item 6. Investments.

- (a) Not applicable. The complete schedule of investments is included in Item 1 of this Form N-CSR.
- (b) Not applicable.

# Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

Not applicable.

# Item 8. Portfolio Managers of Closed-End Management Investment Companies.

Not applicable.

# Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

Not applicable.

## Item 10. Submission of Matters to a Vote of Security Holders.

Not applicable.

## Item 11. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures within 90 days of this filing and have concluded that the registrant's disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the registrant in this Form N-CSR was recorded, processed, summarized, and reported timely.
- (b) The registrant's principal executive officer and principal financial officer are aware of no change in the registrant's internal control over financial reporting that occurred during the registrant's second fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

# Item 12. Disclosure of Securities Lending Activities for Closed-End Management Investment Companies.

Not applicable.

## Item 13. Exhibits.

- (a)(1) The registrant's code of ethics pursuant to Item 2 of Form N-CSR is attached.
- (2) Separate certifications by the registrant's principal executive officer and principal financial officer, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 and required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached.
  - (3) Written solicitation to repurchase securities issued by closed-end companies: not applicable.
- (b) A certification by the registrant's principal executive officer and principal financial officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and required by Rule 30a-2(b) under the Investment Company Act of 1940, is attached.

## **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

T. Rowe Price Global Allocation Fund, Inc.

By /s/ David Oestreicher
David Oestreicher
Principal Executive Officer

Date June 14, 2019

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, this report has been signed below by the following persons on behalf of the registrant and in the capacities and on the dates indicated.

By /s/ David Oestreicher
David Oestreicher
Principal Executive Officer

Date June 14, 2019

By /s/ Catherine D. Mathews

Principal Financial Officer

Date June 14, 2019

## **CERTIFICATIONS**

- I, David Oestreicher, certify that:
- 1. I have reviewed this report on Form N-CSR of T. Rowe Price Global Allocation Fund;
- Based on my knowledge, this report does not contain any untrue statement of a material fact
  or omit to state a material fact necessary to make the statements made, in light of the
  circumstances under which such statements were made, not misleading with respect to the
  period covered by this report;
- Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, changes in net assets, and cash flows (if the financial statements are required to include a statement of cash flows) of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in rule 30a-3(c) under the Investment Company Act of 1940) and internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of a date within 90 days prior to the filing date of this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
