### Investment Description

- Linked to the S&P 500® Index
- Unlike ordinary debt securities, the securities do not pay interest or repay a fixed amount of principal at maturity. Instead, the securities provide for a payment at maturity that may be greater than, equal to or less than the stated principal amount of the securities, depending on the performance of the underlying from the initial underlying value to the final underlying value. The payment at maturity will reflect the following terms:
  - If the value of the underlying increases, you will receive the stated principal amount *plus* 120% to 130% (to be determined on the pricing date) participation in the upside performance of the underlying
  - If the value of the underlying remains unchanged or decreases but the decrease is to a value that is greater than or equal to the final barrier value, you will be repaid the stated principal amount
  - If the value of the underlying decreases to a value less than the final barrier value, you will lose a significant portion, and possibly all, of the stated principal amount of your securities
- The final barrier value is equal to 70% of the initial underlying value
- Investors may lose up to 100% of the stated principal amount
- All payments on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.; if Citigroup Global Markets Holdings Inc. and Citigroup Inc. default on their obligations, you could lose some or all of your investment
- No periodic interest payments or dividends
- The securities will not be listed on any securities exchange and, accordingly, may have limited or no liquidity. You should not invest in the securities unless you are willing to hold them to maturity.

\* Expected. To the extent that the issuer makes any change to the expected pricing date or expected issue date, the valuation date and maturity date may also be changed in the issuer's discretion to ensure that the term of the securities remains the same.

On the date of the related preliminary pricing supplement, Citigroup Global Markets Holdings Inc. expects that the estimated value of the securities on the pricing date will be at least \$900.00 per security, which will be less than the public offering price. The estimated value of the securities is based on CGMI's proprietary pricing models and Citigroup Global Markets Holdings Inc.'s internal funding rate. It is not an indication of actual profit to CGMI or other of Citigroup Global Markets Holdings Inc.'s affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See "Valuation of the Securities" in the accompanying preliminary pricing supplement.

**The securities have complex features and investing in the securities involves risks not associated with an investment in conventional debt securities. See "Risk Factors" beginning on page 3 in this term sheet, "Summary Risk Factors" in the accompanying preliminary pricing supplement, "Risk Factors Relating to the Securities" in the accompanying product supplement and "Risk Factors" in the accompanying prospectus supplement.**

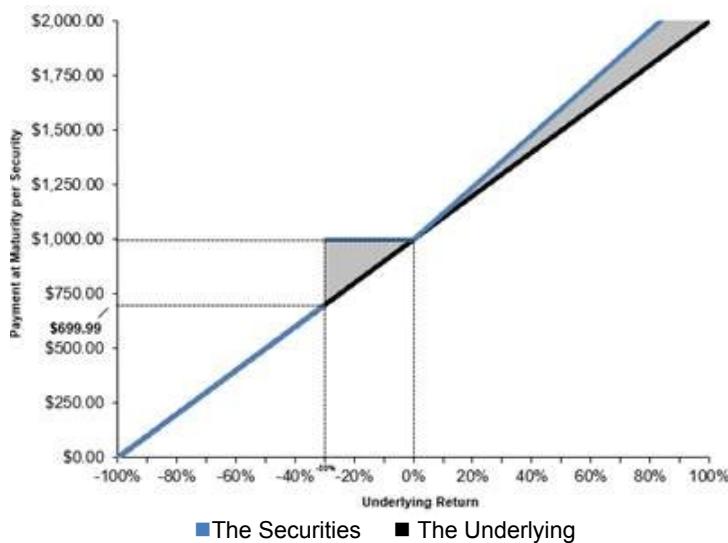

**This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.**

Investors should carefully review the accompanying preliminary pricing supplement, product supplement, underlying supplement, prospectus supplement and prospectus before making a decision to invest in the securities.

## Payment at Maturity

For each \$1,000 stated principal amount you hold at maturity:

- If the final underlying value is **greater than** the initial underlying value:  
\$1,000 + (\$1,000 × underlying return × participation rate);
- If the final underlying value is **less than or equal to** the initial underlying value, but **greater than or equal to** the final barrier value:  
\$1,000; or
- If the final underlying value is **less than** the final barrier value:  
\$1,000 + (\$1,000 × underlying return)

**If the final underlying value is less than the final barrier value, you will receive significantly less than the stated principal amount of your securities, and possibly nothing, at maturity.**
